Work Experience

Sky Workflows, LLC **Jun 2024 – Present**
Product Designer

Main Product Designer of a company involved in custom and in-house product development. In fact, I perform the role of a Design Lead. I lead the full work cycle — from research and UX prototyping to handoff and QA. In in-house products, I work in a team with product managers and developers (including a Tech Lead), conduct design reviews, and support implementation. I organize work with a 3D designer (custom models and animations) and graphic designers (branding and identity), supervise and mentor juniors. I defend design solutions before clients and Product Owners. I develop design systems for all new products.

Plarq (FinTech) — Client Project for *Plarq, LLC*

- Development of a complex platform for managing and accounting for payments to scrap metal suppliers in partnership with Tochka Bank LLC (Tochka Bank). Product implementation term — 3 weeks.
  - The platform is equipped with a flexible access system (roles) for company employees with the ability to manage up to 7 companies and an unlimited number of branches from a single personal account.
  - Interaction with partners from Tochka Bank on legal issues and adjustment of financial processes in full compliance with the legislation of the Russian Federation.
  - The intuitive data filling process is implemented through progression at all stages of creating payments, recipients, and companies.
  - Pushed and implemented the following solutions: creation of branches, limitation of functionality by roles, profiles of recipients and companies, light and dark interface themes.
- Link to project:: https://figma.timurkarchava.com/r/z3DjfU

Production Dashboard (IndustrialTech) — Client project for *Russian Railways, JSC*

- Development of an administrative dashboard for rail grid production workshops with the function of monitoring the status of regional facilities and current production processes based on sensor data.
  - Created an interactive 3D scene in Blender with dynamic states of the rail grid, changing depending on sensor readings. Participated in the integration of the 3D model in .glb format into the web interface using Three.js together with a Junior Frontend Developer.
- Link to project: https://figma.timurkarchava.com/r/W9zdJg

DKP (LegalTech) — Client project for *DKP Auto*

- Express design development of an iOS and Android application for generating vehicle sale and purchase agreements. Product implementation term — 25 hours.
  - At the request of the customer, implemented a custom UI Kit in the "Liquid Glass" style, without using ready-made components — all elements, screens, and animations were designed manually.
  - Pushed and implemented the idea of a contact book for faster processing of contracts with recurring buyers and sellers.
- Developed a detailed User Flow scheme for each screen for presentation to the customer together with

animations.

- Link to project: https://figma.timurkarchava.com/r/FOMzHE

MetSoyuz (EnvironmentTech) — Client project for *Sacha, LLC*

- Design development of a multi-page responsive website for a subsidiary of the Sacha corporation — MetSoyuz.
  - Developed a career portal with current vacancies, as well as a news portal for publishing corporate and industry materials.
- Acted as an Art Director in the development of the company's visual identity, supervising the logo creation process.
- Link to project: https://figma.timurkarchava.com/r/diZrem

PAQO Wallet (FinTech) — *In-house product*

- Developed the design of a multi-platform application for one of Russia's first legal crypto-banks, with a design friendly to users without experience with cryptocurrencies.
  - Designed a custom design system with flexible personalization for each user with a function for further commercialization (Using themes, profile banners, and profile badges).
  - Created the company's mascot "Paqoboy", which is deeply integrated into the application design. The mascot is presented on educational screens, as well as in external communications.
  - Implemented a gamified referral system with the integration of the mascot in Tamagotchi format.
- Worked closely with the development department. Conducted design reviews of intermediate results, identified errors, and helped resolve them.
- Took on a UI/UX Designer intern (Junior) for training. The result of his internship was the PAQO Wallet landing page.
- Link to project: https://figma.timurkarchava.com/r/4lVRf0

NDA (FinTech) — *In-house product*

- Refined, designed, and developed a complex financial online platform consisting of four personal accounts and two applications.
  - Brought the design file and the site to a single whole, as the live version differed from the initial design mockup.
  - Implemented a full-fledged design system by reworking an unfinished iteration from a previous designer. Competently introduced it into production. Conducted design reviews at every stage of integrating new functions.
  - Developed new complex functions in each of the accounts, which are absent from competitors in the market.
- Implemented the design of a completely new company product (Fintech Android application), which was aimed at mass user and ecosystem expansion. The application is at the marketing campaign planning stage.
- Showcase available upon request

Fino+ (EnterpriseTech) — *In-house product*

- Commissioned refinement of a custom ERP system for a company with a large volume of financial operations, with a focus on improving UX for employees.
  - Developed functionality for integration and conducting transactions with counterparties, adding files to operations, and invoicing other companies. Implemented the "company cash register" concept. Reworked key elements of the first iteration, including base tables.

    - Refined the administrator panel screens, optimized the authorization system and user access level management.
- Showcase available upon request

DemPix (EcomTech) — Client project for *IP Govorova Elena Anatolyevna Commissioned*

- Commissioned refinement of a marketplace for selling digital codes and services DemPix. The initial product did not take into account many subtleties of marketplaces: product uploading, communication between buyers and sellers, store profiles, and other important flows.
    - Reworked key user flows. Implemented a product upload system with automatic code issuance. Created profiles for buyers and sellers with ratings and the ability to communicate before, during, and after the transaction. Refined the main pages of the site, filters, and the product page.
    - Designed an auction system.
    - Developed an administrator panel with functions for moderation, basic promotion and product management, product category management, and user management.
- Link to project: https://figma.timurkarchava.com/r/qbvLiH

PROFitness (HealthTech) — Client project for *Fitness Podolsk LLC*

- Developed a new design for an application with a strong focus on gamification for the federal fitness chain "PROFitness" in the Telegram Mini App format.
    - Developed a user activity tracking system based on workout records and body measurements. Integrated gamification using achievements and gifts for receiving them. Prepared the basis for future social integration with leaderboards.
    - Created convenient online booking for individual and group classes via a calendar inside the application. Implemented the ability to buy workouts and equipment through an online store. Developed a system for entering the chain's gyms via a generated QR code inside the application.
- Together with the sales department, reworked the Customer Journey Map and integrated subscription purchases into the application. Subscriptions were also reworked; now the client can flexibly configure their card via a constructor.
- Together with the company's lawyer, conducted a review of the application for compliance with new amendments to the law on personal data. Corrected the final design and helped with writing the legal text.
- Link to project: https://figma.timurkarchava.com/r/tBWC4f

iFeelGood (HealthTech) — Client project for I Feel Good, LLC

- Refinement of the Android application for maintaining a healthy lifestyle I Feel Good commissioned by the company.
    - Implemented a new food diary function with the ability to set goals and enter detailed meal parameters.
    - Added an AI chatbot that helps the user by sharing tips and educational materials.
    - Performed refinement of modal windows for undergoing monthly health checkups.
    - Redesigned signing and registration processes.
- Link to project: https://figma.timurkarchava.com/r/UgqL54

SIE Moscow (RetailTech) — Client project for *IP Makhaeva Anastasia Alexandrovna*

- Developed the design of the Telegram Mini App for purchasing experiences SIE Moscow.
    - In an extremely short time, at the request of the client, created the design of a gifting application. Clients are offered the purchase of gifts with express delivery in Moscow for their significant others, as

well as a subscription to a concierge service that planned dates within the application. Implemented a system for tracking information about the partner, namely their holidays and preferences.

- Link to project: https://figma.timurkarchava.com/r/VzR3NE

IP Belekhov Artem Alekseevich **Feb 2022 – Mar 2024**

Web Designer, Product Designer

Initially engaged in the development of product cards for marketplaces as a Web Designer. As the company grew, engaged in the development of websites and interfaces for a gaming project, managed the work of a Java Developer.

Fable Real RolePlay (RetailTech) — *In-house product*

- Developed the site, launcher, and game interfaces for the Fable Real RolePlay Minecraft game server.
  - Created the design of the site for players, which allows managing their account. Implemented functionality for personal accounts, achievements, and payment for server access.
  - Developed the design of a game launcher for Windows with the ability to install modifications for the game without leaving the platform.
  - Inside the game, a custom player interface was developed. The user could go through the registration stage, create a customized character, and also manage their profile data.
- Link to project: https://figma.timurkarchava.com/r/nuwcof

Digital Warehouse (RetailTech) — *In-house product*

- Development of designs for the digital code store Digital Warehouse.
  - Created designs for product cards for Ozon, Wildberries, Yandex.Market. The products were in the top sales, and the designs I developed were stolen by other sellers.
  - Developed the design of a site for automatic order issuance. A system of multiple personal accounts was worked out: buyer and administrator.

Project Development

IP Lipatnikov Elisey Nikolaevich (GameTech, DatingTech) **Jun 2025 – Present**

Product Designer, Web Designer

- Refinement and development of interfaces at Starlake Digital studio, engaged in the development of a Garry's Mod game server for Ivan Zolo, as well as custom development.
  - Developed and implemented new game mechanics and their interfaces. They are already available on the server.
  - Optimized and improved existing screens taking into account the features of the Lua language and the Source engine.
- Within the framework of a third-party project of the studio, the Telegram game Mafia Nightfall, created new screens and profile customization mechanics adapted to the specifics of the Unity engine.
- Refinement of interfaces for the NoDating Telegram Mini App, as well as the creation of a product branch for group calls.
- Design of publications for Starlake Digital social networks.

Shadow Motors, LLC (MobilityTech) **Jan 2025 – Mar 2025**

Product Designer, Product Manager

- Complete packaging of the luxury car rental service Shadow Motors.

    - Conducted research on the target audience, based on which naming, visual and verbal identity, as well as corporate style for social networks, the site, and documentation were developed.
- Developed the design of a responsive site with a fully worked-out customer journey map. The first iteration of the site was created on Tilda taking into account the platform's limitations. Further versions of the site will be implemented customly.
- Managed two teams, coordinating the site development department and the external communications department (advertising campaign, content and media plan for 3 months). The company successfully launched, and the fleet is estimated at tens of millions of rubles.
- Link to project: https://figma.timurkarchava.com/r/p1QYDT

CSK, LLC (PropTech) **Sep 2024 – Sep 2024**
Web Designer

- Created a site for the construction company "Tsarskoye Selo Construction Company".
    - Adapted the customer's ready-made site design for development. Initially created the site in HTML/CSS, but later, at the customer's request, remade the final version via Tilda Zero Block.
- Link to project: https://figma.timurkarchava.com/r/Vagl8s

Saoko (RetailTech) **Sep 2020 – Aug 2021**
Web Designer

- Development of designs for the conceptual clothing and accessories boutique Saoko.
    - Developed the corporate style of the company. Created a brand book, a guideline for using identity, designed social networks, and created a mood board for the company. As promo material for the B2B segment, implemented a guideline for creating their own brand book for aspiring partner companies.
    - Implemented the design of an online store site. Participated in layout from scratch in HTML/CSS.

Education

UNECON **Sep 2024 - Jun 2026**
Master's Degree, Management (Marketing and Digital Communications) *Saint-Petersburg, Russia*

- Published scientific articles in RAS collections, developed business projects for startups ordered by clients from the fields of radiology and travel. GPA 5.0.

UNECON **Sep 2020 - Jun 2024**
Bachelor's Degree, Advertising and Public Relations in Business *Saint-Petersburg, Russia*

- Diploma with honors. Published a scientific article in a RAS collection. Winner of internal development contests ordered by Gazprom Neft, Nevsky Plant, and other large companies. GPA 4.8.

Skills

Hard Skills

- Figma / Pixso / Sketch (Web and mobile interface design; Responsive design; Components; Prototyping; Design systems; Dev Handoff; QA/design review);
- ProtoPie (Interface prototyping);
- UX research (Usability tests; Interviews; Surveys; Behavior analysis; Feedback collection);
- HTML/CSS/JS - basic level (I develop independently);
- User Flow, Customer Journey Map, Jobs To Be Done, How Might We, Empathy maps;
- Adobe CC (Photoshop, Illustrator, After Effects, Lightroom);

- Blender (Scene assembly; Editing shaders and materials; Lighting setup; Basic modeling and animation);
- Knowledge and adherence to HIG and Material Design;
- Task management, team coordination, Jira, Agile (Scrum);
- English language: C2 (Fluent)
- Russian language:: Native

Soft Skills
Communication skills, creativity, proactivity, responsibility, adaptability, argumentation of decisions, teamwork.
